

# Exact™ 3132F

# Ethylene-based Plastomer Resin

# **Product Description**

General

Exact™ 3132F resin is an ethylene-based hexene plastomer produced using ExxonMobil Chemical's EXXPOL® Catalyst Technology. It is designed for use in both monolayer and multilayer blown film applications requiring outstanding sealability and toughness. TnPP is not intentionally added to Exact™ 3132F resin.

### Legal Statement

 $Contact\ your\ Exxon Mobil\ Chemical\ Customer\ Service\ Representative\ for\ potential\ food\ contact\ application\ compliance\ (e.g.\ FDA,\ EU,\ HPFB).$ 

This product is not intended for use in medical applications and should not be used in any such applications.

Tris(nonylphenol)phosphite (TNPP) CAS# 26523-78-4 is not intentionally used by ExxonMobil in this product. Although this product is not routinely tested for its presence, based on product composition knowledge this substance is not expected to be present. However, the fact that this substance is not intentionally used by ExxonMobil in this product does not exclude that trace levels of this substance may be present as a result of the specific characteristics of the raw materials and/or of the manufacturing process.

# Exact<sup>™</sup> 3132F Ethylene-based Plastomer Resin

# **Processing Statement**

Film (1.25 mil/31.7 micron) made from Exact 3132F on a 2.5 inch blown film line having a 6 inch die with a 60 mil die gap at a 2.5:1 blow-up ratio and melt temperature of 375-395°F (191-202°C).

#### Notes

Typical properties: these are not to be construed as specifications.

- <sup>1</sup> Product may not be available in one or more countries in the identified Availability regions. Please contact your Sales Representative for complete Country Availability.
- <sup>2</sup> Value reported is an estimate based on ExxonMobil's correlation from melt flow rate data measured at other standard conditions, based on ASTM D 1238.
